DETAILED ACTION

Claims 29-42 are pending.

Response to Arguments

The applicants arguments filed on April 29, 2005 have been fully considered. The Examiner finds that the amended claims are subject to restriction requirements. See following rejection .

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 29-36 and 37-40 are drawn to user verification classified in class 705 subclass 64.
 - II. Claims 41-42 are drawn to electronic commerce, classified in class 705 subclass 26.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed such as an IP address. The subcombinations have separate utility such as performing an electronic transaction (invention II).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
